

Factorio AI Platform Demo — User Guide

Generated 2026-07-26 · Live demo: <https://factorio.co.uk>

Demo notice: every company, invoice, offer, integration, investment, and AI response shown here is synthetic or illustrative. The platform does not guarantee funding, payment timing, or investment returns.

This guide is a browser-driven tour of the Factorio AI Platform demo. It follows the three primary roles and uses reviewed evaluation questions to demonstrate AI behavior.

1. Borrower / Supplier

Start in Factorio AI

- The Supplier demo opens in one AI workspace—there is no marketplace or triage queue.
- Select the paperclip and upload a digital PDF, image, JSON, or text invoice.
- The demo uses synthetic invoices; digital PDFs are converted to Markdown before xAI extraction.

Upload an invoice and receive an offer

- Factorio AI extracts supplier, debtor, invoice number, amount, dates, bank details, and payment terms.
- The response clearly says “You’re pre-approved!” and presents an indicative offer table.
- Download PDF, Accept, and Change remain visible; final terms are subject to verification.

I extracted invoice **WEEK 110 2020 001** for **Samikand Precision Works LLC**. Here is your indicative financing offer:

Invoice value	UZS 185,000,000.00
You receive today (85%)	UZS 157,250,000.00
Invoice term	60 days
Indicative financing fee	UZS 6,290,000.00

Financing costs 2.0% per 30 days on the advanced amount. Final terms remain subject to verification.
Review: Missing supplier_registered_address; Missing sector; Missing explicit tax_amount and subtotal breakdown; Line items missing quantity and unit_price

How invoice financing works

Profile, banking, and accounting connections

- My Profile contains a hypothetical company identity and masked settlement bank information.
- Lloyds Bank is labelled as a planned Open Banking connection.
- QuickBooks, Xero, and Sage are clearly labelled hypothetical demo integrations.

The screenshot shows the Factorio web interface. The top navigation bar includes the Factorio logo, links for Sign in / Sign out, a ROLE dropdown menu set to 'Supplier', and a flag icon. The left sidebar contains a menu with 'Factorio AI', 'New chat', 'My applications', and 'My Profile' (which is highlighted). The main content area is titled 'My Profile' and includes a subtitle: 'Synthetic company and settlement details used for this demo account.' Below this is a table with company details.

FIELD	DETAILS
Company	Northstar Office Supplies Ltd
Company number	09876543
Registered address	18 Meridian Way, Manchester M1 4AB, United Kingdom
Contact	Amelia Hart · finance@northstar-demo.example
Bank	Demo Commercial Bank
Account name	Northstar Office Supplies Ltd
Sort code	12-34-56
Account number	87654321
IBAN	GB29 DEMO 1234 5687 6543 21
SWIFT / BIC	DEMOGB2L

Below the table, the 'CONNECTIONS' section is titled 'Banks & accounting' with the subtitle 'Synthetic integration choices for this demo supplier. No external account is currently connected.' There are two integration cards: 'LLOYDS BANK' (labeled 'Planned' in orange) and 'QuickBooks' (labeled 'Demo available' in green). The Lloyds Bank card mentions 'OPEN BANKING' and 'Bank-account verification and transaction access will use a consent-based Open Banking connection.' The QuickBooks card mentions 'ACCOUNTING' and 'Hypothetical connection for invoices, customers, payments, and reconciliation.'

Track applications and contracts

- My Applications shows synthetic financing requests created from accepted invoices.
- Each accepted request can expose a one-page financing contract between Factorio Ltd and the extracted supplier.
- Downloaded PDFs use supplier, Factorio reference, date, and document-type slugs.

The screenshot shows the Factorio web interface. On the left is a sidebar with navigation links: 'Factorio AI', 'Factorio AI' (with a star icon), 'New chat', 'My applications' (highlighted), and 'My Profile'. The main content area is titled 'My applications' and contains a table of synthetic financing requests. The table has columns for INVOICE, DEBTOR, AMOUNT, GRADE, STATUS, and CONTRACT. There are 13 rows of data. At the top right of the interface, there are links for 'Sign in / Sign out', a 'ROLE' dropdown menu, and a 'Supplier' dropdown menu.

INVOICE	DEBTOR	AMOUNT	GRADE	STATUS	CONTRACT
INV-20260030	Gekko & Co	\$96,836	A	funded	Contract
INV-20260029	Nakatomi Trading	\$156,185	A	settled	Contract
INV-20260028	Prestige Worldwide	\$15,741	B	funding	Contract
INV-20260027	Massive Dynamic	\$203,783	B	funding	Contract
INV-20260026	Wayne Enterprises	\$19,006	C	funding	Contract
INV-20260025	Zorg Industries	\$183,266	B	funding	Contract
INV-20260024	Wonka Industries	\$112,732	A	funding	Contract
INV-20260023	Umbrella Industries	\$124,649	A	settled	Contract
INV-20260022	Gekko & Co	\$162,547	B	funding	Contract
INV-20260021	Sterling Cooper	\$164,780	B	funding	Contract
INV-20260020	Zorg Industries	\$97,544	B	settled	Contract
INV-20260019	Oscorp Industries	\$66,435	C	settled	Contract

2. Investor

Ask Investor AI about performance

- Investor AI is grounded only in the selected demo investor's positions and computed metrics.
- Eval question shown: "How are my investments performing?"
- Expected and realised returns are distinguished; the assistant does not guarantee outcomes.

Ask about concentration and risk

- Eval question shown: “Where is my portfolio most concentrated?”
- Debtor and sector exposure percentages are calculated deterministically before reaching the model.
- Copy and Share create portable session transcripts; shared links are read-only snapshots.

Review the portfolio cockpit

- See account value, net annual return, active invested, expected outstanding, and realised results.
- Aging, payment habits, grades, due dates, and position status support deeper AI questions.
- Use the demo investor selector to compare isolated synthetic portfolios.

The screenshot displays the Factorio investment portfolio cockpit. The interface includes a sidebar with navigation options: FACTORIO AI, Investor AI, New chat, Overview, Portfolio (selected), Statement, Invest, Marketplace, Auctions, Secondary, Auto-invest, Intelligence, AI Triage, and AI Reports. The main content area is titled 'Your investment portfolio.' and features several key metrics and tables.

NET ANNUAL RETURN

Interest received	\$58,502
Write-offs	-\$0

Inspect available invoices

- Browse synthetic open invoices by debtor, sector, risk grade, term, and estimated return.
- Funding progress and invoice economics support manual selection.
- Returns are estimates and invoice financing retains credit, fraud, dilution, concentration, and liquidity risk.

The screenshot shows the Factorio web application interface for browsing invoice opportunities. The top navigation bar includes 'Sign in / Sign out', 'ROLE' (Investor), 'VIEWING AS' (Investor), and a flag icon. The sidebar on the left lists navigation options: FACTORIO AI, Investor AI, New chat, How are my investments performing, OVERVIEW, Dashboard, Portfolio, Statement, INVEST, Marketplace (highlighted), Auctions, Secondary, Auto-invest, INTELLIGENCE, AI Triage, and AI Reports.

The main content area is titled 'Browse invoice opportunities.' and shows '18 invoices currently seeking funding.' Below this is a filter section with dropdowns for 'SECTOR' (All), 'RISK GRADE' (All), and input fields for 'MAX TERM (DAYS)' and 'MIN RETURN %'. There are 'Apply' and 'Clear' buttons.

The main area displays a grid of six invoice cards, each showing the company name, seller, invoice amount, funding progress, and estimated return. Each card has an 'Invest' button.

Company	Seller	Invoice Amount	Funding Progress	Advance	Fee / 30d	Est. Return
Wayne Enterprises	Summit Freight	\$76,140	80% funded	81%	3.0%	17.7%
Soylent Corp	Pioneer Trading	\$4,798	18% funded	88%	2.4%	14.4%
Oscorp Industries	Ironclad Manufacturing	\$158,930	35% funded	89%	1.1%	2.3%
Sterling Cooper	Acme Distribution Co	\$164,780	67% funded	84%	3.1%	12.5%
Initech LLC	Greenfield Agro	\$97,892	21% funded	91%	2.6%	1.3%
Zorg Industries	Acme Distribution Co	\$199,705	23% funded	90%	3.3%	1.6%

Configure risk-aware Auto-invest

- Choose conservative, balanced, or growth preferences plus grade, term, return, sector, debtor-concentration, and per-invoice limits.
- Investor AI ranks only eligible invoices and explains each proposed allocation.
- The preview does not place money; review or change preferences before execution.

The screenshot shows the Factorio web interface for configuring auto-investing. The left sidebar contains navigation links: FACTORIO AI, Investor AI, New chat, OVERVIEW (Dashboard, Portfolio, Statement), INVEST (Marketplace, Auctions, Secondary), Auto-invest (selected), INTELLIGENCE (AI Triage, AI Reports), and a status bar at the bottom.

The main content area is titled "Automate your investing." and includes a sub-header "Set your rules and let Factorio place bids on matching invoices automatically." Below this is a form for configuring risk preferences. The form has a "STATUS" toggle set to "Inactive". The "RISK PREFERENCE" is set to "Balanced - A/B-grade, diversified". The "MINIMUM RISK GRADE" is set to "B". The "MAX PER INVOICE" is set to "10000000.00". The "MAXIMUM DEBTOR CONCENTRATION (%)" is set to "25.00". The "MAXIMUM INVOICE TERM (DAYS)" is set to "90". The "MINIMUM ESTIMATED RETURN (%)" is set to "0.00". The "PREFERRED SECTORS" are set to "agriculture,construction". There is a checkbox for "Enable auto-invest" and a "Save settings" button.

Below the form is a table titled "INVESTOR AI ALLOCATION PLAN" showing proposed allocations based on the saved risk preference. The table has columns: INVOICE, DEBTOR, GRADE, TERM, RETURN, PROPOSED, and WHY. The table contains five rows of data.

INVOICE	DEBTOR	GRADE	TERM	RETURN	PROPOSED	WHY
INV-20260028	Prestige Worldwide	B	60 days	6.8%	\$794	Balanced fit: grade B, 60d term, 6.8% estimated return; debtor currently 0% of active portfolio.
INV-20260015	Nakatomi Trading	B	45 days	5.2%	\$794	Balanced fit: grade B, 45d term, 5.2% estimated return; debtor currently 0% of active portfolio.
INV-20260011	Zorg Industries	B	15 days	1.6%	\$794	Balanced fit: grade B, 15d term, 1.6% estimated return; debtor currently 0% of active portfolio.
INV-20260003	Initech LLC	B	15 days	1.3%	\$794	Balanced fit: grade B, 15d term, 1.3% estimated return; debtor currently 0% of active portfolio.
INV-20260002	Cyberdyne Systems	B	60 days	6.7%	\$794	Balanced fit: grade B, 60d term, 6.7% estimated return; debtor currently 17% of active portfolio.

At the bottom of the table, there is a link: "Ask Investor AI about this plan --".

Reconcile investment activity

- The statement records investments and settlements with invoice and counterparty references.
- Filter by date, type, counterparty, invoice, and amount.
- Export CSV for external analysis or reconciliation.

The screenshot displays the Factorio AI web interface. On the left is a sidebar with navigation links: FACTORIO AI, Investor AI, New chat, How are my investments performing, OVERVIEW (Dashboard, Portfolio), Statement (highlighted), INVEST (Marketplace, Auctions, Secondary, Auto-invest), and INTELLIGENCE (AI Triage, AI Reports). The main content area is titled 'Your transaction history.' and features a filter bar with fields for FROM, TO, TYPE, COUNTERPARTY, INVOICE NO., and AMOUNT. Below the filter bar is a table of transactions.

DATE	TYPE	COUNTERPARTY	INVOICE NO.	AMOUNT
2026-12-29	Settlement	Nakatomi Trading	INV-20260029	+\$149,712
2026-12-12	Settlement	Oscorp Industries	INV-20260019	+\$65,573
2026-10-12	Settlement	Umbrella Industries	INV-20260001	+\$25,996
2026-08-18	Settlement	Zorg Industries	INV-20260020	+\$96,515
2026-08-04	Settlement	Umbrella Industries	INV-20260023	+\$116,977
2026-05-17	Settlement	Globex Corporation	INV-20260009	+\$147,467
2026-04-29	Investment	Bluth Company	INV-20260006	-\$18,752
2026-03-30	Investment	Massive Dynamic	INV-20260027	-\$27,771

3. Admin

Operate the back office

- Admin sees platform KPIs, queues, exceptions, and operational navigation in one workspace.
- Navigation groups are collapsible and can be minimized to keep a complex toolset manageable.
- Global settings include the USD, GBP, EUR, or UZS display-currency override.

Coordinate the Agent Fleet

- Fourteen specialists span orchestration, origination, servicing, oversight, and growth.
- Agents use grounded tools and preserve approval gates for credit, communication, publishing, spend, and money movement.
- The activity feed makes agent operations auditable.

Run marketing and SEO agents

- Browser-driven eval question shown: “Build a supplier invoice-finance keyword cluster.”
- SEO & AI Search and Paid Marketing agents create research and drafts without silently publishing or activating spend.
- Campaign work should include audience, intent, evidence, measurement, guardrails, and explicit approval.

The screenshot displays the 'int fleet' interface, which is an autonomous team of back-office agents coordinated by a supervisor. The main task is 'Build a supplier invoice-finance keyword cluster.' The interface is organized into several sections:

- SEO & AI SEARCH:** Contains the 'Supplier Invoice-Finance Keyword Cluster (UK)' task. It includes an 'Evidence base' section with details about the current homepage (https://factorio.co.uk) and a search for supplier-specific sections. A text input field shows 'e.g. Start dunning on invoice INV-20260010' with a 'Run' button.
- ORCHESTRATION:** Features a 'Supervisor' card that routes plain-English instructions to the right specialist and runs it. It has an 'autonomous' status and an 'Edit skills' link.
- ORIGINATION:** Features an 'Onboarding / KYC' card that screens clients and debtors and sets facility limits. It also has an 'autonomous' status and an 'Edit skills' link.
- DECISIONING:** Contains two cards: 'Underwriting' (scores debtors and sets grade, advance, and price) and 'Fraud' (flags duplicate / anomalous invoices). Both have 'autonomous' status and 'Edit skills' links.
- SERVICING:** This section is currently empty.

On the right side, there is a sidebar with a 'deal advance - Summit Retail' header, a 'Proposal -> Negotiation' status, and a timestamp of '07-22 09:02'. Below this, it shows 'agent: collections.dunning' and 'collections.dunning - INV-20260010' with a 'reminder (stage 1)'.

Inspect and edit agent skills

- Open Agent Skills to view each specialist's current Markdown instructions.
- Admin can save a database-backed prompt version and review change history.
- Revert restores a selected earlier version while preserving an audit trail.

Process and approve invoices

- The processing queue supports verification, exceptions, risk review, and funding readiness.
- AI may recommend or draft; final financial and credit actions remain approval-gated.
- Synthetic data makes the workflow safe to explore in the platform demo.

Journal -- Bank reconciliation --

Manage platform integrations

- Integration cards show demo connectivity for accounting, banking, communications, and document services.
- Connection status is demonstrative and must not be treated as a live third-party authorization.
- The invoice ingestion endpoint supports structured external demo data.

Review the audit trail

- Audit records identify actor, action, entity, detail, and time.
- Use the log to inspect human and agent activity, approvals, and configuration changes.
- Prompt-version history and action logs support governance of the agentic platform.

The screenshot shows the Factorio application interface. On the left is a sidebar with navigation links categorized under Automation, Overview, Origination, Servicing, Growth & Marketing, and Markets. The main panel displays the 'Audit log' section, which includes a table of audit records. The table has five columns: WHEN, ACTOR, ACTION, ENTITY, and DETAIL. The records show various actions performed by different actors, such as setting currency, advancing deals, dunning collections, connecting integrations, and releasing funding.

WHEN	ACTOR	ACTION	ENTITY	DETAIL
2026-07-26 18:19	admin:super	settings.currency	platform	GBP
2026-07-22 09:02	agent:sales	deal.advance	Summit Retail	Proposal -> Negotiation
2026-07-22 09:02	agent:collections	collections.dunning	INV-20260010	reminder (stage 1)
2026-07-16 22:17	admin:super	integration.connect	Xero	
2026-07-16 19:35	admin:finance	funding.release	invoice INV-1	approved via console

Prepare borrower transactional emails

- Customer Service can render Factorio-branded bank-connection and accounting-connection reminders from checked-in Markdown templates.
- Each draft uses a personalized HTTPS resume link, support contact, and application-specific wording without sensitive bank or accounting credentials.
- Delivery is disabled in this demo until Postmark, a verified sender, approval/lifecycle triggers, audit records, and delivery webhooks are configured.

Suggested demo script

1. Sign in as **Supplier**, upload a sample invoice, inspect the offer, and open My Profile.
 2. Switch to **Investor**, ask the two evaluation questions shown above, then compare Portfolio and Auto-invest.
 3. Switch to **Admin**, open Agent Fleet, run a specialist prompt, inspect Agent Skills, then review Processing, Accounting, Integrations, and Audit.
- The demo credentials and one-click roles are available from the Sign in page. Use only synthetic information.
